

# Guillaume Besson

## PERSONAL DETAILS

D.O.B	29 August 1995
Web	<a href="http://www.besson.co/">http://www.besson.co/</a>
Phone	+33 6 11 67 39 56
Email	<a href="mailto:guillaume@besson.co">guillaume@besson.co</a>

## EDUCATION

High School	Charles De Foucauld Lyon Scientific Diploma
University	Epitech Lyon Second Year - Valedictorian

## EXPERIENCE

### Freelance

Jan 2014 – present

### FullStack Web Developer

I work with clients who need a quick development process for a specific need. By using Agile Methods and the MEAN (MongoDB, Express, AngularJS and NodeJS), I allow them to build a product very fast and providing their users the greatest experience web technologies can offer.

I lead training sessions with small groups of professionals, and initiate them to the advantages of AngularJS and NodeJS.

### Chaze

Aug 2012 – Mar 2014

### Associate - Front-End Lead Developer

With a team of 7 people, we created Chaze, a social network centered around challenges you share with your friends.

I built Chaze web application to allow our users to create challenges, explore the platform and react to their friends contents. I also took care the system administration of our servers.

We made a lot of Growth Hacking on Facebook and Twitter to acquire more than 5000 active users.

### EyeSnap

Jul 2013 – Dec 2013

### Internship - FullStack Developer

This company has a image recognition software and my mission was to develop commercial solutions around it.

I created EyeSnap Search, on the SaaS model by developing a REST API available for our clients to use. I built the platform using the MEAN stack, documented it and communicated with clients to help them integrate this product to theirs.

I also designed EyeSnap Tracker that explores and save all images of a specific website to find matches with the clients' image database. This service is currently tracking millions of images, sharing the load on several servers.

## PROFILE

- [twitter.com/geekuillaume](https://twitter.com/geekuillaume)
- [github.com/geekuillaume](https://github.com/geekuillaume)
- [linkedin.com/in/guillaumebesson](https://www.linkedin.com/in/guillaumebesson)

I was born in Lyon, France. Quickly, I was attracted by technology and science. Ultimately, the Web and its dynamic most passionate me.

By passion, I'm a self-educated Web developer.

Entrepreneurship, science and graphics are also areas that interest me and I do a continuous survey on all these subjects.

## SKILLS

### Specialities

AngularJS  
NodeJS  
MEAN Stack

### Front-End Web

HTML5  
CSS3 (with some SASS)  
JS (with some CoffeeScript)  
Yeoman - Grunt - Bower
